This is a good website to view the phases from different perspectives. On this site, view each of the clips to see different perspectives of the changing phases. This link is mainly just for you to study,

Link 5: <http://www.paulcarlisle.net/mooncalendar/>

This neat site will allow you to see the moon phases for this month and any other month, too!

Change the month and year to the date of your next birthday and it will change so that you can see the phases of the moon for that month! Hover the mouse over the date and the name of the phase will pop up.

Draw a picture of the Moon phase on the day you were born and on your birthday in 2017.

Birth Year

2017

My birthdate (month, day, and year) - _____

Link 6: <http://moon.nasa.gov/moonmisconceptions.cfm>

- On the same day, would people in China see the same phase of the moon that we would? _____
- There technically is not a “dark side of the moon” because all parts of the moon face the sun at some time. What would be a better term for the part of the moon we cannot see? _____
- What are the only phases of the moon that cannot be seen during the day? _____
